

THE PLACE OF NIETZSCHE.

Sir,—Your reviewer in Saturday's issue, under the caption "A Gallery of Great Lives," demurs at the inclusion of Nietzsche, and expresses the opinion that many greater philosophers have lived within recent years. I am curious to know what names your critic had in mind—perhaps Adolf Hitler? As the reviewer admits, Nietzsche is little known to the English, and is, therefore, suspect as a philosopher, a foreigner, and a novelty. The measure of greatness, however, is not popularity, nationality, nor orthodoxy, and the grounds upon which Nietzsche deserves to be numbered amongst the great are precisely in inverse ratio to those things.—I am, sir, &c.,

"BRUNO."
